

The Father Stavros Kofinas Fund

1. The ENHCC manages a fund called The Father Stavros Kofinas Fund. The decision to initiate this fund was made by the ENHCC committee to honour Fr Stavros Kofinas who was the first co-ordinator of the network.
2. The aim of the fund is: a. To support representatives of organisations from countries with a lower economic standard in order that they can participate in the bi-annual consultation of the ENHCC. b. To support participating organisations in their yearly contribution to the ENHCC.
3. The financial support for attending the bi-annual consultation is meant for representatives whose organisation is not able to pay the whole amount of the consultation fee. The amount of the financial support can be 100%, 50% or 25% of the consultation fee. Candidates should send a request to the Treasurer of the ENHCC outlining the reasons for their request. The candidates have to show a letter of recommendation from their organisation. Both templates are downloadable from the website.
4. Travelling costs are excluded for financial support from this Fund. The Treasurer presents a report of the financial transactions of the fund to the committee once a year.
5. Organisations from countries with a lower economic standard can make a motivated appeal to the fund for a reduction of their yearly contribution. The reduction amount is for either 25% or 50% of the contribution. Organisations should send a request to the Treasurer of the ENHCC, which must also outline the reasons for their request.
6. The Fund is administrated by the Treasurer of the ENHCC
7. Distributions of the Fund are made by the Treasurer, after consulting the Co-ordinator.
8. The Fund is filled with a part of the yearly contributions and gifts meant for the Fund.
9. The start-up capital was € 4.000. The yearly contributions and gifts are meant to keep 4000 euro in the Fund before each consultation.
10. In cases with circumstances not covered by these regulations, the Treasurer makes a decision after deliberation with the Co-ordinator.
